Tea House

BOYNE ISLAND CREMATORIUM

Side view of the Chapel

The Boyne Island Crematorium is a new community facility located on the banks of the Boyne River, outside Gladstone, that includes a chapel, tea house, cremator and administration rooms.

Bligh Tanner worked closely with Calliope Shire Council and Studio 39 Architecture to ensure that the buildings on the site were appropriately situated to maintain the tranquillity of the natural setting.

The soaring roof of the chapel was achieved with large steel spans, while the more contemplative tea house utilises timber construction.
